661.645.6805

STEVENSON RANCH, CA 91381

EDUCATION

- **B.S. Computer Science (Magna Cum Laude)**
 - Arizona State University, Tempe

EXPERTISE

- **Languages:**

◦ C/C++	◦ C#	◦ SQL	◦ Scheme
◦ Python	◦ Java	◦ Assembly	◦ Prolog
◦ OCaml	◦ HTML		
- **Creative & Design:**

◦ Unity	◦ Unreal	◦ Photoshop	◦ Illustrator
---------	----------	-------------	---------------
- **Tools:**

◦ Visual Studio	◦ ReactJS	◦ Eclipse	◦ CLion
◦ Git	◦ FastAPI	◦ VIM	◦ Putty
◦ Docker	◦ Postgres	◦ IDLE	◦ Ubuntu
	◦ PGAdmin	◦ Spyder	

PROFESSIONAL HISTORY

Lawrence Livermore National Laboratory, Livermore CA

April 2023 – April 2025

Academic Graduate Appointee: WEAVE Team

April 2024 – April 2025

- Developer responsible for expanding the library of supported file types for simulation data management software (storage, visualization, provenance, ...)
- Evaluated multiple options to for output file types and structure to maximize speed, minimize size, and meet user requirements.
- Incorporated the new file types into existing C++, Python, and Fortran frameworks.
- Designed a new append functionality in C++ and Python for all existing file types, tuned to user requirements for space efficiency and data streaming.

Academic Graduate Appointee: ACES Team

April 2023 – April 2024

- Developer responsible for developing computing environment for nuclear non-proliferation efforts, architected to support simulating conceptual models
- Created ReactJS UI components and REST APIs to manage user permissions, conceptual model simulations, and other UI components using both JavaScript and Python.
- Implemented a new email functionality including front-end and back-end enhancements in JavaScript and Python.
- Handled positive and negative unit tests for all REST Security endpoints in Python.
- Participated in daily standup meetings to discuss progress, solicit feedback, and adjust to changing requirements.

PROJECTS

'Trivia Trek' – NASA sponsored interactive experience

August 2021 – April 2022

- Developed a web-based interactive experience in Unity for the NASA Psyche Mission.
- Prototyped all levels and screens in C#. Collaborated directly with the project manager and sponsor to ensure the project met requirements and the team kept on schedule.
- Responsible for all testing throughout development, writing bug and progress reports.
- Removed C# coding impediments as one of the team's scrum masters.
